

AAT Online Learning Weekly Schedule & Plan

Hi everyone! I know these are tough times and you are getting a lot of different instructions and information from all of your teachers on top of the other stresses you have to deal with. I am going to miss seeing your smiling faces in class every day. I am so sorry that you all have to go through this, as students and I want to make this online learning process as straight forward as possible. First of all, please know that I am going to do everything I can make sure that your grades are fair and properly represent the content you understand. My goal of this online learning is to continue learning the important concepts of Advanced Algebra Trig so students feel prepared for their math courses next year. I strongly suggest that students take notes during the video lessons and work through the HW assignments so they can have these notes and resources for next year. I am also going to make sure that I am communicating frequently and answering any and all questions you might have come up. Everything for the week will be posted on Monday on my website so students can work at their own pace. The goal is for 25 minutes of math per day.

Here is the weekly schedule for AAT:

Monday

There will be a video focusing on a new topic. I would like students to be taking notes during the video and following along with the examples. Just like in class please pause the video to try out the examples yourself first and then follow along to check your answers.

Tuesday

There will be a HW assignment based off of Monday's video. These HW assignments will *not* be graded but I strongly suggest that students complete these to prepare for their Friday quiz and get ready for next year's courses. Please make sure you check your answers as well.

Wednesday

Wednesday will be just like Monday where there is a video lesson. I would like students to be taking notes during the video and following along with the examples. Just like in class please pause the video to try out the examples yourself first and then follow along to check your answers.

Thursday

This will be just like Tuesday. There will be a HW assignment based off of Wednesday's video. These HW assignments will *not* be graded but I strongly suggest that students complete these to prepare for their Friday quiz and get ready for next year's courses. Please make sure you check your answers as well.

Friday

There will be a quiz every Friday that is not a test week. Quizzes will be posted Thursday and then due by *Sunday at 5PM*. These quizzes will be worth *20 points* total for each chapter – either 1 or 2 quizzes per chapter. The quiz will be linked on my website in the notes section and could be in different formats. Sometimes it will be multiple choice, sometimes fill in and sometimes short answer. The instructions at the top of the quiz will explain what students need to turn in and how they can turn in their work if it is required. These points will be the only thing going into the grade book and there *will not* be quiz points back. The expectation is that students are doing their own work on these quizzes; not working together, using each other's answers or using the aid of tutors, family members or friends.

Tests

There will be three scheduled tests during this online learning experience. Tests are going in the grade book as *100 points each*. These tests are schedule for 3 Thursdays (May 7, May 21 and June 12) and are *due the next Monday by 10PM*. This gives students a couple days to complete the test so that they still only have to do 25 minutes of math per day – they should not have to do any math over the weekend! The expectation is that students are doing their own work on these tests; not working together, using each other's answers or using the aid of tutors, family members or friends.

Office Hours

I plan to be available by email throughout the week but I will be sitting at my email to immediately respond on Tuesday and Thursday from 12PM-1PM weekly.

In Class Grades

- Ch 3 Quiz Points
 - If you would like to get quiz points back from Ch 3 you can send me pictures of the quiz and test with notes highlighting which questions go together
- Ch 5 Quiz Points
 - I do not have a way to hand back the ch 5 tests so if you would like quiz points back for Ch 5 you need to redo all of the questions you want points back for showing all of your work on a separate sheet of paper – if the questions are correct you will get the points back. You need to work on these on your own.
- Missing Tests (Ch 3 or 5)
 - You can email me to either have the test excused or email me that you would like to take the test and I will send you a copy to complete on your own without the aid of any notes, family, peers or outside resources
 - Exception is chapter 5 test you may use notes
- I will still be dropping the lowest test score at the end of the semester
- All missing work/retakes/quiz points back will be due May 8th
